

Flexibility, Scalability & Visability For Continued Growth

"We were impressed by the depth of knowledge that Second Foundation displayed during our initial assessment. They recommended a Navision solution that gave us visibility into our production scheduling, work in progress and inventory."

*-Phil McTaggart, Controller,
Broda Seating*

Broda® Seating has been manufacturing specialty seating for hospitals, nursing homes and long-term care facilities since 1981. Broda® chairs incorporate the Comfort Tension Seating™ system that allows proper heat and moisture exchange as well as suspending residents to minimize seating pressures. As their reputation for quality products continues to grow, so does the demand for their product. This year production will have increased to over 6,500 chairs. Scott Hunter, Purchasing/Inventory Control Manager and Phil McTaggart, Controller of Broda® needed to find a solution that would help them to manage their growth by having better visibility of material requirements, production flow and inventory. "We had outgrown our previous system and needed to get a handle on production, so that we could continue to grow to meet the market demand. Our goal was to find a solution provider that could help us to overcome our bottleneck," states Scott. "That's when we asked Second Foundation to help us find the right solution."

Drawing on their experience in the area of manufacturing, the team at Second Foundation presented a solution based upon Microsoft Dynamics NAV. "We were impressed by the depth of knowledge that Second Foundation displayed during our initial assessment," says Phil. "They recommended a Microsoft Dynamics NAV solution that gave us visibility into our production scheduling, work in progress and inventory." The solution has given Broda® the flexibility and scalability to continue to grow, and visibility to know exactly what is happening and when. Finished goods inventory on evaluation can now be tracked within the system. Production lead times have also decreased as a result of accurate and timely production orders generated within Navision. The team at Second Foundation solve business pains by applying their expertise with powerful business tools from Microsoft®, Epicor® and Sage.
