

Simplifying the Complex Business

We first turned to Second Foundation when we needed help upgrading our Sage Accpac solution. *Danayr needed someone who could understand the different facets of our business and how to bring them all together, using the software that we were already using.*

-Dianne Dance, co-owner,
Danayr

Danayr in Ayr, is a multifaceted business owned by a brother and sister team, Jamie and Dianne Dance. The business consists of a gas bar and convenience store, pet food store, and a golf driving range. The Dance family has done business in Ayr for over 40 years with three generations involved. "The best part of our business is helping the customers," comments Dianne Dance. "Either the regulars every morning for gas and coffee or the pet owners that tell their pet stories or the smiling golfers finding a half hour out of their busy schedule for some green, they all make our business viable and enjoyable day after day. We first turned to Second Foundation when we needed help upgrading our Sage Accpac solution. Danayr needed someone who could understand the different facets of our business and how to bring them all together, using the software that we were already using."

Second Foundation helped in upgrading Danayr's Accpac software and then went on to set up their Point of Sale solution. When custom development was required to link their diesel fuel pump systems to Accpac, Second Foundation created the integration and provided training and support on the entire system. "Like Danayr, we believe the best part of our business is helping our clients," says David Popowich. "We are focused on creating the right solution to help our clients."

"Second Foundation is a trusted partner, who provides us with the right support at the right time," says Dance.

When you need to upgrade your ERP solution, integrate into your industry specific software or need support and service just call Second Foundation today.
