

Working Together to Meet Your Needs

"Together, we were able to effectively meet our needs for an Accpac work order system, customized fuel invoices and a bridge to upload data to our Corporate Office."

Martin Mills*

For over 35 years, Elmira Truck Service has provided Quality Fleet Maintenance and Repairs. With a 24 Hour Cardlock Fuel Depot on site, they are committed to providing quality service to their valued customers. "After moving to a brand new facility two years ago," states Bert Martin, Manager of Elmira Truck Service, "we realized that our fuel invoicing software was rapidly reaching obsolescence."

"In addition, our existing manual work order system was not effective for tracking vehicle maintenance/repair history and keeping up with the demands of a busy shop," reflected service manager Glenn Gingrich. An additional challenge was that all records needed to be uploaded to their Corporate Office – Martin Mills Inc. for financial tracking and reporting. Bert and his team recognized that changes needed to be made and Martin Mills wanted to capitalize on their existing investment of their accounting software Sage Accpac.

Elmira Truck Service chose Second Foundation Consulting to help them meet their ERP needs. Donna Fulcher, Network Administrator at Martin Mills, worked as the project coordinator on the project. In combination with her team and the consultants from Second Foundation, unique solutions were developed. "Together, we were able to effectively meet our needs for an Accpac work order system, customized fuel invoices and a bridge to upload data to our Corporate Office." The team at Second Foundation Consulting solves business pain by applying their expertise with powerful business tools from Microsoft®, Epicor® and Sage.
