

Integration and Support With The Right Partner

"When we were looking for a company to service our needs, *we wanted an organization that was both knowledgeable and trustworthy.* We've been working with Second Foundation for over 6 years now. They are there when we need them, lending a helping hand and supporting us so that we can support our membership."

-Nick Driedger, CEO,
Mennonite Savings and Credit Union

Mennonite Savings and Credit Union is a unique full service financial cooperative that bridges the daily banking needs of some 15,000 members across Ontario with the "barn-raising" mutual aid traditions of the Waterloo County Mennonite community. Since 1964 MSCU has grown to have 6 full-service branches and 5 sub-locations, while ethically administering more than \$500 million for their members. "When we were looking for a company to service our needs, we wanted an organization that was both knowledgeable and trustworthy," says Nick Driedger, CEO. "We've been working with Second Foundation for over 6 years now. They are there when we need them, lending a helping hand and supporting us so that we can support our membership."

Mennonite Savings and Credit Union is using Epicor Enterprise for their General Ledger and Accounts receivable. "To be able to capture and analyze our day to day transactions, we needed to integrate our Epicor software with the CGI banking system data. The developers at Second Foundation did that for us. They were very knowledgeable and accomplished the project on-time and on budget," says Beth Metzger, Database Administrator. "We value our long-standing relationship with Second Foundation and we are now working with them to upgrade our Epicor software."

The team at Second Foundation Consulting solves business pains by applying their expertise with powerful business tools from Microsoft®, Epicor® and Sage.
