

Managed Growth to Boost Your Bottom Line

"Their practical knowledge of both business operations and systems allow them to step in, and *go beyond the normal accounting and shipping aspects of ERP software* to quickly help service our customers' requirements."

-Richard Donnelle, President,
Superior Solutions

Being successful and growing a business can present many challenges. When Richard Donnelle of Superior Solutions in Cambridge needed help keeping up with his growing industrial cleaning products business, he turned to Second Foundation. Superior is a leading supplier of sanitation chemicals, supplies and cleaning equipment. They also provide training and consulting services in the area of health and safety. Locations in Cambridge and Barrie provide local service to Superior's customers. "We knew we needed help keeping up with the volume of incoming orders," states Mr. Donnelle. "Second Foundation came highly recommended. So we knew we could trust them to help us 'clean up' our business management systems."

The Second Foundation team was there to help. They worked with Superior Solutions to extend the Epicor Enterprise solution to provide customer self service ordering over the web. "Second Foundation provides full service support," Says Richard. "Their practical knowledge of both business operations and systems allow them to step in, and go beyond the normal accounting and shipping aspects of ERP software to quickly help service our customers' requirements. This solution gave us the ability to respond to our growth and provided our customers improved service all without having any negative affect to our day-to-day business."

Second Foundation will help you support, grow, update, or replace your business processes and systems.

Call us today to find out how we can help you with your business.
