

With AvaTax™, Epicor customers can take the worries out of sales tax compliance. Ask us to prove it.

THE PROPOSITION

...

If an easy-to-implement solution can be integrated with your Vantage or Enterprise system to help your company achieve compliance, give you audit protection, and at the same time save you time and money so you focus on revenue-generating activities, and we can prove this to you, would you adopt it for your business?

By integrating its service directly into accounting and e-commerce applications, Avalara has helped hundreds of companies and over 6,500 registered users eliminate the tedious work and complexity of calculating, collecting, reporting on, and remitting taxes in multiple jurisdictions. That is the proposition that has made Avalara the leading provider of web-hosted sales tax management services. Now, as a result of an alliance between Avalara and Epicor, Enterprise and Vantage users will be able to use the service with soon-to-be-released* integrated versions of Avalara's AvaTax Connect™, or can today connect any e-commerce application to Avalara's Web Services API with a Software Developer's Kit (SDK).

Sales tax is the last thing your business needs to focus on. Let's face it: sales tax is a state-required, compulsory activity. Any time or money spent against compliance is, by nature, non-revenue generating. Yet the relentlessly shifting landscape of tax rule and boundary changes across more than 8,000 North American taxing jurisdictions means—in absence of automation—the operational distraction of staying compliant is a drag on the efficiency of your organization.

AvaTax makes automation simple. A hosted, Web-service-based or on-site solution, AvaTax automatically performs address validation, sales tax jurisdiction research and rate calculation—all on the fly within your accounting application, with no change to your existing workflow. Fully detailed reports are always at your fingertips, and returns are automatically pre-populated and generated.

Are you on the @list?
Be among the first 100 to get on the pre-release call list at booth 121 for two to three months' added service!

You won't believe how invisible sales tax compliance processes can become.

It's all about managing sales tax, and automating the actual compliance tasks: With its signature AvaTax Dashboard™ management console, AvaTax is integrated with the accounting or e-commerce application in just minutes, fully enabled with the taxability, nexus, reporting and filing profiles unique to your business. From there, AvaTax simply gets your sales tax function done, with no change to your existing workflow—from rate research and maintenance to reporting and returns—invisibly, instantly, and accurately.

AvaTax™: Technology for sales tax best practices.

- » **AvaTax Connect™** comes pre-integrated for fast implementation, no software or hardware to buy, and no change to your existing workflow.
- » Or, with **AvaTax SDK™**, simply integrate Avalara's sales tax Web services API with any e-commerce, third party or custom-built solution with use of a comprehensive Software Developer's Kit (SDK).
- » If all-local processes and data is a corporate requirement, **AvaTax Onsite™** gives you all the functionality and integrated simplicity of AvaTax in a fully site-installed implementation.
