

Vision and Strategy Sessions

What is a Vision and Strategy Session?

A vision and strategy session is a discovery meeting facilitated by Second Foundation's team of experts drawing input from your organization's senior management. Each session we facilitate becomes very unique as our focus is defined by your company's desired outcome for this meeting. These sessions are usually focused on a project under consideration or an area of your business that is currently challenged by gaps or inefficiencies. A big part of our focus is on building a short and long term strategic plan as it relates to technology; which includes getting the most out of what you already have in-house. Our commitment from this meeting is to collaborate with your team on building a road map to better position your organization to realize its potential!

Who should attend your Vision and Strategy Session?

Representation from all areas of your business that will be impacted by the outcome of this meeting should be included.

Where Should Your Vision & Strategy Session Take Place?

The environment your session takes place in depends greatly on personal comfort and the best suited learning environment for you and your team. The Vision and Strategy Session can be held at your office, an off-site location, one of our partner's offices or in one of our locations in US or Canada.

The key objectives for your vision and strategy session:

The vision and strategy session is designed to help support your team in building a plan to achieve your short and long term desired outcome.

Areas of focus:

- Corporate Overview and Organizational Structure
- Technical Environment
- Business Objectives
- Areas of opportunity
- Key Performance Indicators
- Business Risk
